Understanding the LASIK procedure

I want to share this article that I read about Lasik since Im also planning to undergo one in the near future, hope this one will give more knowledge about it. Anyway, LASiK,, or laser-assisted in-situ keratomileusis, is one of today's most popular vision correction procedures because of its great versatility. It can correct nearsightedness, farsightedness and astigmatism for a broad range of prescriptions. LASIK corrects vision by reshaping the cornea, which allows light to focus more precisely on the retina, resulting in improved vision.

The LASiK Procedure

Step 1: Using advanced technology, your eyes and their visual fields are mapped out entirely. This customized and extremely detailed information is then reviewed by your surgeon and transferred directly to the laser.

Step 2: The cornea of the eye is numbed with eye drops and the eyelids are gently held open to prevent blinking. Using a microkeratome, your surgeon creates a thin flap from the outer corneal layers of the eye, this flap is then gently folded back and away from the eye.

Step 3: Using an Excimer laser, which emits a cool beam of light upon the eye, your surgeon will gently reshape the cornea.

Step 4: Finally, the protective flap that was created in Step Two is gently placed back in its original position. Your eyes will begin to heal immediately and visual improvements are often seen right after the procedure or the very next day!  
Hope it helps folks...

The thing about online dating is, most of the new dating sites on the Internet now free or paid. Think that just because you have to compete with all of the other well known name dating sites. You have to buy or purchase fake profiles, that is 100% unfair to the members who sign up for their service especially for a paid service. For example I do reviews on dating sites to see which one's are fake. If you have never heard of a dating site especially if it isn't free then if they have millions of members, they don't offer trial service or they need your credit card then it's more than likely fake profiles. On the other hand if they offer a trial service, it's 100% free or they don't have millions of users then you can believe that site is 100% authentic with its members. Remember dating sites that say they have millions chances are you have heard of it before, but if you have not but like the name and what you see but they do not have a lot of members then those are the sites that will have real profiles and the best chances for you to meet someone. The two newest online dating sites I have researched are FaithFulMeeting

Dating Cafe Lounge

Both are 100% Free they are very new so they have real profiles, but the best thing about these two new sites you keep your page position no matter how many people sign up after you. If its a million people who sign up after you and when you signed up you where 2nd, then that's where you will remain until you unregister.

She got a lot of big things from that shower and the only things left on her registry are small or really expensive. I want to get her something she will use a lot. Other than diapers what is the BEST gift I can get.
