I think better way to do 1 dating site every month. Google gives every new site 2 pr. So if you made 10 sites and made link from each other you will have good Pr for all 10 sites.

what is the idea of your adsense revenue share program?
what is average convertion rate?

Subject: Re: how is your adsense revenue share program working?

We have two ways of how you can advertise our website.

1. Pay per visitor + pay per lead
You send us visitors and we pay you for each action they do - page views, signups, etc. The rate depends on several parameters - country, traffic quality, visitor's activity. This rate is calculated automatically and is not flat. In average it is higher then competitors' sites.

2. AdSense revenue share program.
We display adsense ad with your adsense ID for 50% of visitors that you will send us. Our adsense ads are optimized very well during the last year and the conversion is quite good as well. The benefit is that you can see statistics directly in your adsense account. You can add channels "livedatesearch.com" and "www.livedatesearch.com" and track your income.

How to make a choice?

This is simple. If you supply AdSense ID in your affiliate profile - you account will be automatically switched into "revenue share" mode. You can check this in on the top of your profile page. Otherwise, if you do not supply AdSense ID, you account is in "pay-per-traffic" mode.

Please let me know if you have any other questions.

Yes, this is a good roundup. I think that a variety of different promotion techniques, such as you've listed, is most beneficial.

I have recently been looking at the incoming links to some of the more highly ranked Australian dating sites. They all seemed to have a range of sites that they'd submitted too, but they seemed to be mostly seo online directories and article directories.

Writtin by John Mathews

Do not use the meta keywords tag. Many people still think of this as a quick fix for SEO. It's not, It only benefits your competition!! how so? well back then search engines used to rely on Meta Keywords to guess which keywords were relevant to a webpage , now the search engines are sophisticated enought to examine the keywords in the body of a webpage.
by placing Meta Tags on a page your giving your competitor a list of important keywords.can then use these keywords and buy PPC ads or optimize their own site for your important keywords. Why give them this sort of business intelligence? Having invested time and money on exhaustive keyword research to identify the important keyword phrases to use for your own SEO and PPC efforts, why on earth would you make a list of your high value keywords public?

Read the whole article at: RankNumberOneOnGoogle.com/blog.html
This website blog is a great source to rely on if you want to learn to get lots of free traffic to your website

You can speed the process of getting pagerank up by getting incoming links from several different sites, but generally its hard to get the pagerank high in a short amount of time - so let time work it for you..

You have to be careful buying the links since its possible that google will catch you when you post in forums like this one - then they will manually suspend your websites ..

admin wrote on Thu, 07 February 2008 10:32We have two ways of how you can advertise our website.

1. Pay per visitor + pay per lead
You send us visitors and we pay you for each action they do - page views, signups, etc. The rate depends on several parameters - country, traffic quality, visitor's activity. This rate is calculated automatically and is not flat. In average it is higher then competitors' sites.

2. AdSense revenue share program.
We display adsense ad with your adsense ID for 50% of visitors that you will send us. Our adsense ads are optimized very well during the last year and the conversion is quite good as well. The benefit is that you can see statistics directly in your adsense account. You can add channels "livedatesearch.com" and "www.livedatesearch.com" and track your income.

How to make a choice?
This is simple. If you supply AdSense ID in your affiliate profile - you account will be automatically switched into "revenue share" mode. You can check this in on the top of your profile page. Otherwise, if you do not supply AdSense ID, you account is in "pay-per-traffic" mode.

Please let me know if you have any other questions.

The thing about online dating is, most of the new dating sites on the Internet now free or paid. Think that just because you have to compete with all of the other well known name dating sites. You have to buy or purchase fake profiles, that is 100% unfair to the members who sign up for their service especially for a paid service. For example I do reviews on dating sites to see which one's are fake. If you have never heard of a dating site especially if it isn't free then if they have millions of members, they don't offer trial service or they need your credit card then it's more than likely fake profiles. On the other hand if they offer a trial service, it's 100% free or they don't have millions of users then you can believe that site is 100% authentic with its members. Remember dating sites that say they have millions chances are you have heard of it before, but if you have not but like the name and what you see but they do not have a lot of members then those are the sites that will have real profiles and the best chances for you to meet someone. The two newest online dating sites I have researched are FaithFulMeeting
Dating Cafe Lounge
Both are 100% Free they are very new so they have real profiles, but the best thing about these two new sites you keep your page position no matter how many people sign up after you. If its a million people who sign up after you and when you signed up you where 2nd, then that's where you will remain until you unregister.

The thing about online dating is, most of the new dating sites on the Internet now free or paid. Think that just because you have to compete with all of the other well known name dating sites. You have to buy or purchase fake profiles, that is 100% unfair to the members who sign up for their service especially for a paid service. For example I do reviews on dating sites to see which one's are fake. If you have never heard of a dating site especially if it isn't free then if they have millions of members, they don't offer trial service or they need your credit card then it's more than likely fake profiles. On the other hand if they offer a trial service, it's 100% free or they don't have millions of users then you can believe that site is 100% authentic with its members. Remember dating sites that say they have millions chances are you have heard of it before, but if you have not but like the name and what you see but they do not have a lot of members then those are the

sites that will have real profiles and the best chances for you to meet someone. The two newest online dating sites I have researched are FaithFulMeeting
Dating Cafe Lounge
Both are 100% Free they are very new so they have real profiles, but the best thing about these two new sites you keep your page position no matter how many people sign up after you. If its a million people who sign up after you and when you signed up you where 2nd, then that's where you will remain until you unregister.

The thing about online dating is, most of the new dating sites on the Internet now free or paid. Think that just because you have to compete with all of the other well known name dating sites. You have to buy or purchase fake profiles, that is 100% unfair to the members who sign up for their service especially for a paid service. For example I do reviews on dating sites to see which one's are fake. If you have never heard of a dating site especially if it isn't free then if they have millions of members, they don't offer trial service or they need your credit card then it's more than likely fake profiles. On the other hand if they offer a trial service, it's 100% free or they don't have millions of users then you can believe that site is 100% authentic with its members.
