This article presents the current relationship between a father and a child in this fast paced and time constraint society and provides many practical advises on how to improve this relationship to benefit the whole family.

It has been estimated that working fathers spend about 3 minutes a day with their children.

Fathers who abandon their families, fathers who rarely see their children because of

divorce, and fathers who are busy and have very little or nothing to do with the raising of their children are common.

Agile has many advantages, but it also has some drawbacks. One of them is that it may not be suitable for all types of projects, and it requires more expertise for certain types of projects. Additionally [mlsdev.com/blog/how-much-does-an-e-commerce-website-cost](https://mlsdev.com/blog/how-much-does-an-e-commerce-website-cost), continuous integration may not be possible with the latest technologies or for projects with multiple development streams.
